Category 20 –MPLS Data Network

20.2.9 MPLS Transport Speeds

20.2.9.1 MPLS Port Transport Speeds

Contractor's Description of Service:

Zayo's MPLS service is a Layer 3 multipoint-to-multipoint virtual private LAN across an MPLS enabled backbone. The MPLS backbone allows for a diverse range of applications (such as voice, video, ERP, and data applications) to be transported over the same platform. Importantly, it allows those applications to be prioritized by importance. Quality of service packet labeling allows for application-specific priority queueing of traffic. For example, voice traffic (assuming it is an application on the data network) is recognized by the network devices and receives priority handling over lower priority traffic, such as web browsing. Zayo's MPLS port-only service does not include the "last mile" of local access (connectivity between Zayo's network and customer's demarcation point). MPLS ports are delivered at Zayo's network points-of-presence (POPs) or mutually agreed upon network meet points.

Geographic Availability:

All Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the California Public Utilities Commission (CPUC) where facilities are available either through Zayo's owned facilities or through resale of ILEC facilities.

State Associated Administrative Fee (SAAF) Charge:

All services in this catalog will have a 2% fee applied. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.

20.2.9.2 MPLS Port and Access Bundled Transport Speeds

Contractor’s Description of Service:

Port-only Service

Zayo’s MPLS port-only service does not include the "last mile" of local access (connectivity between Zayo’s network and customer's demarcation point). MPLS ports are delivered at Zayo’s network points-of-presence (POPs) or mutually agreed upon network meet points.

Port and Access Bundled Service

MPLS port and access bundled transport service includes an MPLS port, the "last mile" of local access (connectivity between Zayo’s network and customer's demarcation point), and an Zayo provided network interface device (NID).

Port, Access and Router Bundled Service

MPLS port, access, and router bundled transport service includes an MPLS port, the "last mile" of local access (connectivity between Zayo’s network and customer's demarcation point), a Zayo provided network interface device (NID), and a Zayo provided "router."

Geographic Availability:

All Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the California Public Utilities Commission (CPUC) where facilities are available either through Zayo’s owned facilities or through resale of ILEC facilities.

20.3.2.1 Extended Demarcation Wiring Services

Contractor’s Description of Service:

Extended Demarc wiring includes wiring and cable related activities required to extend the service demarcation point to the Customer defined termination location or cross-connect point from the Contractor's Minimum Point of Entry (MPOE).

Extended Demarc wiring shall include all necessary hardware including wire and/or cable, connectors, jumpers, patch panels, minor materials and jacks.

Extended Demarc wiring shall also include all necessary labor required to complete the provisioning of service including installation, testing, trouble shooting, labeling and documentation.

Extended Demarc wiring is limited to the following:

- Installation of cabling for extending services from the MPOE location to the Customer's point of utilization;
- Installation of cross-connects or rearrangement of existing jumpers;
- Identification and testing of existing cabling beyond the MPOE to the Customer's equipment location; or
- Testing, trouble shooting, labeling and completing documentation.

Geographic Availability:

Zayo will provide Extended Demarc wiring to support the services covered by this IFB for all Customer occupied buildings where services under this Contract are being offered by Zayo.

State Associated Administrative Fee (SAAF) Charge:

All services in this catalog will have a 2% fee applied. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.
